

Rifine е изтънчено, декоративно варово покритие, което създава атмосфера на спокойствие и хармония. Неговата фина и ненатрапчива визия придава усещане за баланс и уют, като предлага по-мек и деликатен ефект в сравнение с традиционната варова мазилка.

Благодарение на различните варианти на обработка, **Rifine** може да създаде както спокойно, матово излъчване, така и лъскав ефект, вдъхновен от техниката "Tadelakt".

Характерни свойства:

- ☒ Изискано декоративно варово покритие за вътрешни стени и тавани
- ☒ От минерален матов до гланцов венециански финиш
- ☒ Вечен и елегантен характер
- ☒ Паропропускливо минерално покритие
- ☒ Неограничена гама цветове с пигментите "**Stoopen & Meeûs**"

Rifine®

Rifine е напълно екологично декоративно покритие, без съдържание на летливи органични съединения (VOC-free). Доставка се в прахообразна форма и сесмесва с вода на място, при нанасяне.

Оцветяването се извършва с прахообразните пигменти "**Stoopen & Meeûs**", които осигуряват широка и устойчива цветова гама. Компанията "**Stoopen & Meeûs**" предлага цялостна система за продукта **Rifine** – от подготовката на основата до защитното покритие.

За повече информация относно подготовката на основата и етапите на нанасяне, препоръчва се да се консултира актуалният технически лист на продукта. Препоръчително е всички защитни покрития да бъдат тествани предварително върху представителна проба.

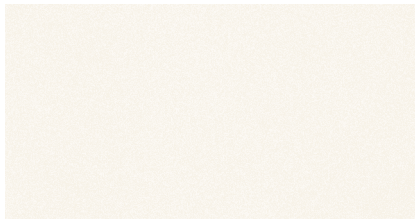

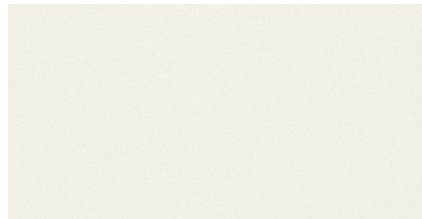

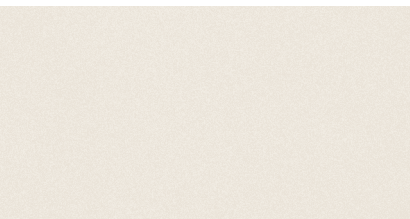

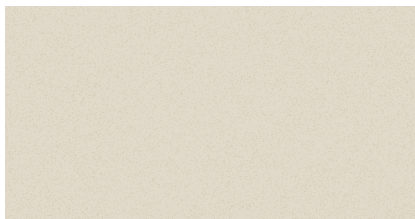

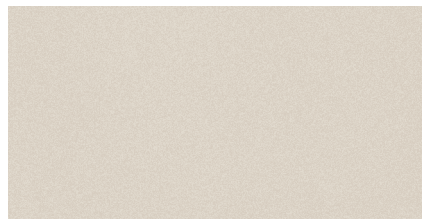

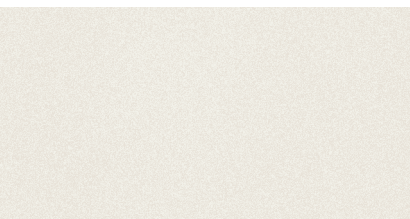

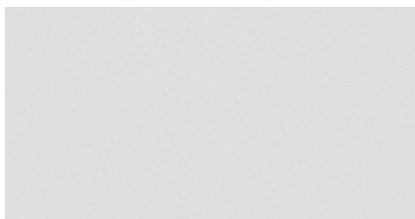

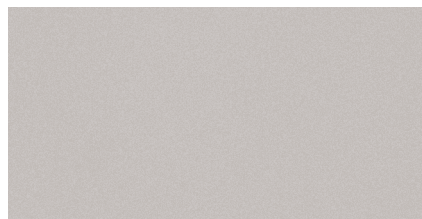

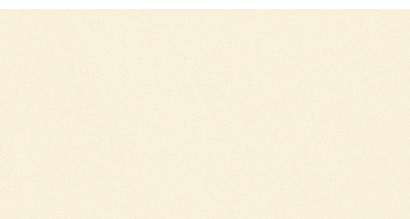

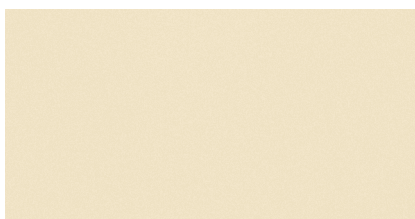

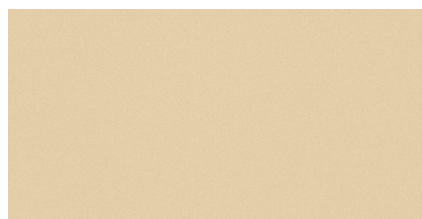

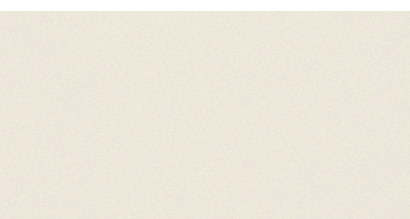

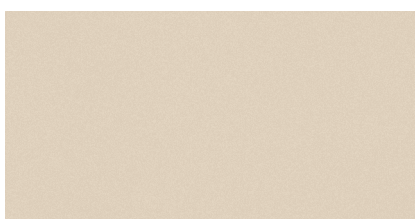

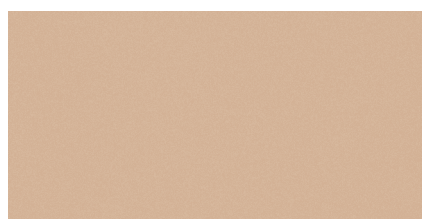

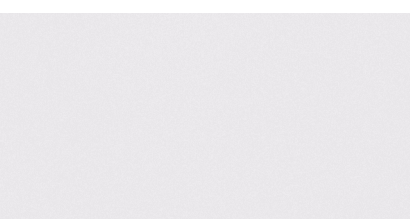

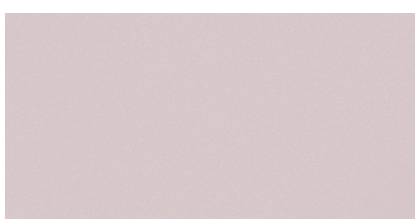

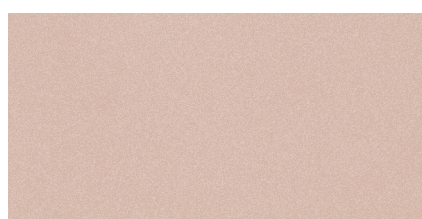

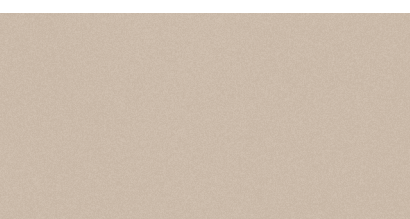

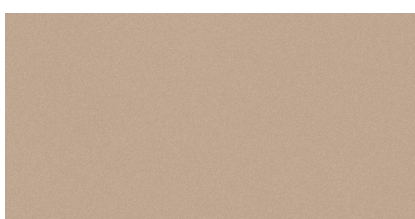

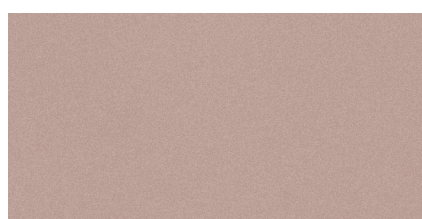

За постигане на най-добри резултати, професионалистите могат да преминат обучение по декоративни техники, предлагано от "**Mineral Stone Coatings**".

Rifine се използва за декоративни повърхностни обработки на вътрешни стени и тавани, придавайки им естествена елегантност и хармония.
